DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: **the first species**, comprising an electrical box having three side by side connectors projecting outwardly from each sidewalls, said connector including a middle connector having a socket sized for receiving one-half inch standard trade size ENT conduit and one pair of outer connectors having sockets sized for receiving three quarter inch standard trade size ENT conduit (Figures 1-7, claims 1-11), **the second species**, comprising an electrical box having attachment ears extending outwardly from said corners adjacent said front surface, said corners having concave external configurations between said rear surface and said attachment ears (Figures 1-3; claims 12-21); **the third species**, comprising an electrical box having box attachment ears and an adapter attached to said box front surface having adapter attachment ears aligned with said box attachment ears (Figures 14-17, 22-25 and 28-31; claims 22-26); and **the fourth species**, comprising an adapter for attachment to a front surface of a square electrical box, said adapter having four attachment ears extending outwardly from said peripheral wall (Figures 9-13, 18-21, 26, 27; claims 27-32).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 12 is generic to claim 22.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
